

In this document, you will learn how to enable the API for third party vendors.

Firm Admin

1. In the Firm Admin, under the *Practice Settings* tab, navigate to **Manage API Integrations**. Select **Grant** to enable any/all 3rd Party Vendors that you will be integrating with.

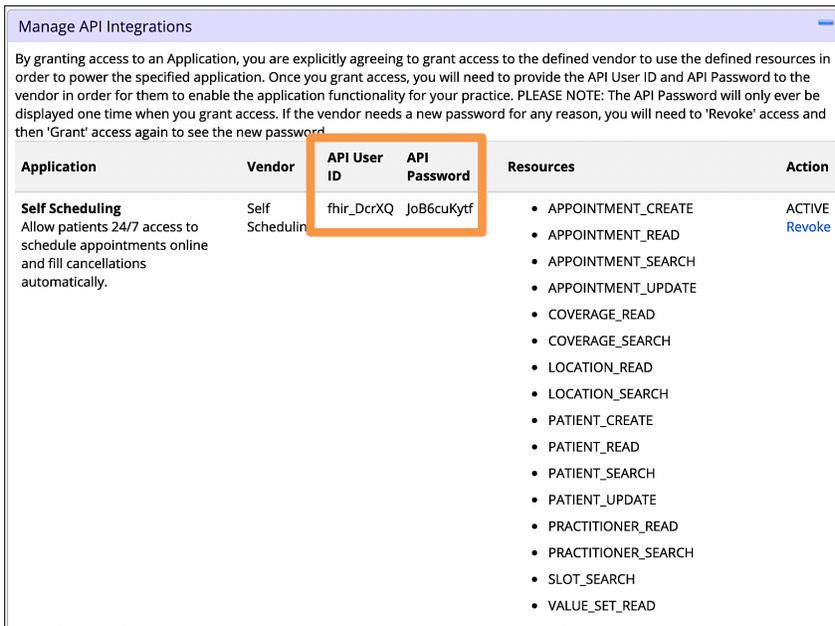

Manage API Integrations

By granting access to an Application, you are explicitly agreeing to grant access to the defined vendor to use the defined resources in order to power the specified application. Once you grant access, you will need to provide the API User ID and API Password to the vendor in order for them to enable the application functionality for your practice. PLEASE NOTE: The API Password will only ever be displayed one time when you grant access. If the vendor needs a new password for any reason, you will need to 'Revoke' access and then 'Grant' access again to see the new password.

Application	Vendor	API User ID	API Password	Resources	Action
Self Scheduling Allow patients 24/7 access to schedule appointments online and fill cancellations automatically.
